# A PHOTOGRAPHICAL STORY

*A book that is at the antithesis of the 'AI era', where every emotion escapes programmed logic.*

A self-taught artist, Aloïs Bruno criss-crosses the earth and hearts in his quest to capture the essence of life. Those little things that make everything.

The joys, the sorrows, the ingredients of our daily lives, while sublimating our emotions and fixing them without ever exaggerating them. Aloïs loves moments, the little moments that make us human.

Through his photography, Aloïs makes visible the intensity of our most intimate introspections. He tells the story of our contemplations, but never on purpose.
